

Accident Data API

1.0 OAS 3.1

[/openapi.json](#)

Integrated German road accident and regional statistics platform.

Metadata

GET / Service to retrieve API information

GET /**metadata/sources** Service to retrieve available data sources

GET /**import-runs** Service to retrieve dataset import history

Counts and Filters

GET /**accidents/filter-by-region**
Service to display accident count for region by level (state, district, municipality)

GET /**accidents/filter-by-time**
Service to display accident count filtered by year, month, weekday and/or hour

GET /**accidents/filter-by-category**
Service to retrieve accident count filtered by year, state, category, and participant type

Time Analytics

GET /**statistics/state-earliest/{state_code}**
Service to get the earliest recorded accident year for a German federal state

GET /**statistics/earliest-year**
Service to get the earliest available accident year in the entire dataset

GET /**statistics/year-over-year/{state_code}**
Service to display Year-over-year accident trend for a federal state

Rates & Rankings

GET	/statistics/rates/{year} Service to retrieve regional accident rates for a specific year	▼
GET	/statistics/district-rankings/{year} Service to display Top or bottom districts by accident count for a year	▼
GET	/statistics/compare-regions Service to compare accident counts across regions over a year range	▼

Cross-source Analytics

GET	/statistics/integrated/fatal-districts/{year} Service to retrieve highest number of fatal accidents for a given year	▼
GET	/statistics/integrated/bicycle-risk-districts/{year} Service to retrieve districts with the highest bicycle accident share for a given year	▼
